SUMMARY & OUTLOOK

The Los Angeles West/South industrial market witnessed vacancy rates remain unchanged at 2.3%, during the quarter. Average asking rents increased 11.1%, year over year, moving from \$0.90nnn to \$1.00nnn. Gross absorption finished the quarter with 2.45 million square feet of activity, while net absorption finished with a loss of 18,000 square feet. Under construction activity increased during the quarter with 534,000 square feet currently underway, as the market has delivered 731,000 square feet of new space for the year. Unemployment rates in L.A. County edged higher from 4.6% to 4.8%, year over year, and are above California (3.9%) and above the U.S. average of 3.6%. Available space remains scarce and overall demand for high-quality space remains strong, which has forced some tenants to look to other markets to accommodate their industrial space needs. Demand for industrial space will continue to be driven by domestic and global consumption levels. In 2017, the Los Angeles and Long Beach Port container traffic recorded its highest container total ever with 16.89 million TEU's, up 8% from 2016 and 7% higher than its second highest year during 2006. Through the third quarter of 2018, total TEU's totaled 12.8 million, up 2.7% compared to the same period last year, and up 11.5% compared to 2016. The investment and sale market for industrial real estate in Los Angeles County remains extremely strong, as median prices have witnessed double-digit annual price growth from 2014 to 2017, and is up another 9.5% through the third quarter of 2018. The capital markets remain solid, but with the Fed continuing to raise interest rates at a measured pace, we do expect overall price growth and demand to cool in the coming year. The overall industrial market remains landlord controlled. We expect vacancy to remain in the 2% to 3% range, with rents expected to rise another 4% to 6% in the coming year.

VACANCY & NET ABSORPTION

VACANCY

Overall vacancy rates were unchanged during the quarter, remaining at 2.3%. Of the seven (7) submarkets within the West/South market, the Lynwood/Paramount submarket ended the quarter with the lowest total vacancy at 0.5%, followed by Torrance/Beach Cities at 1.2%, Carson/Rancho Dominguez at 1.7%, Gardena/110 Corridor at 2.6%, Long Beach at 3.0%, El Segundo/Hawthorne at 3.7%, with the Westside finishing the quarter at 4.3%. Since the third quarter of 2017, overall vacancy rates have increased from 2.0% to 2.3%, but still remain near an all-time low.

RENTAL RATES & TIME ON THE MARKET

Standard industrial rental rates increased 11.1%, year over year, moving from \$0.90nnn to \$1.00nnn. Of the seven major submarkets within the West/South market, the Westside ended the quarter with the highest standard industrial rental rate of \$1.75nnn, followed by El Segundo/Hawthorne at \$1.17nnn, Torrance/Beach Cities at \$0.90nnn, Long Beach at \$0.84nnn, Carson/Rancho Dominguez at \$0.76nnn, Gardena/110 Corridor at \$0.73nnn, and the Lynwood/Paramount submarket finishing the quarter at \$0.68nnn. Average asking rates increased 1.0% during the quarter, moving from \$0.99nnn to \$1.00nnn.

ABSORPTION

During the quarter, gross absorption finished with 2.45 million square feet of activity, down 5% compared to the previous quarter, but higher by 1% compared to a year ago. Net absorption finished the quarter with a loss of 18,000 square feet of occupied space, and has lost 42,000 square feet for the year. In 2017, the market gained 1.5 million square feet, after gaining 1.0 million square feet in 2016, +2.1 million square feet during 2015, and +6.1 million square feet in 2014. Overall demand and activity remains at lower levels mostly due to the lack of available space in this market.

CONSTRUCTION ACTIVITY

Under construction activity increased during the quarter, with 534,000 square feet currently underway, as the market has delivered 731,000 square feet of new space for the year. In 2017, the market added 1.5 million square feet of new space, after delivering 332,000 square feet in 2016, 280,000 square feet during 2015, and 41,000 square feet in 2014. During the past five years, the market has averaged annual delivery totals of 640,000 square feet. Among the space currently under construction, none of the space has been pre-leased or is committed yet.

The information contained in this report has been obtained from sources deemed reliable and has incorporated fourth-party data which has not been independently verified by DAUM. While we do not doubt its accuracy, DAUM makes no guarantee or warranty as to its completeness or accuracy. Due to the dynamic (constantly changing) database which DAUM uses to compile and analyze markets contained in this report, previously published statistics may vary from the data published in this report. Statistics and data have been revised to reflect changes in the following categories: existing buildings being verified and added to the database, new or revised occupancy information gathered, new construction being added to the inventory, building demolitions and renovations, as well as other factors that would necessitate revisions to the data and the properties surveyed. This methodology allows us to present the most current and up-to-date information, trend analysis and comparative statistics for this report.

METHODOLOGY & TERMINOLOGY

Methodology

Industrial and flex (R & D) buildings that are 5,000 square feet and greater.

Direct Vacant SF

Space that is vacant and ready for occupancy by a user. The space is being offered for lease or sale directly from the landlord.

Total Vacant W/ Sublet SF

Space that is vacant and ready for occupancy by a user. The space is being offered for lease or sale by the landlord or for sublease by the current tenant.

Direct Vacancy Rate

Total vacant direct space (vacant space for lease or sale from the landlord or owner) divided by the total rentable square footage for existing buildings only.

Vacancy W/ Sublet Rate

Total vacant direct space and sublease space divided by the total rentable square footage for existing buildings only.

Gross Absorption

The total change in occupied space over a given period of time, counting space that is occupied but not space that is vacated by tenants. Gross absorption differs from leasing activity, which is the sum of all space leased over a certain period of time.

Net Absorption

The net change in occupied space over a given period of time, calculated by summing all the positive changes in occupancy (move ins) and subtracting all the negative changes in occupancy (move outs).

Under Construction

Planned buildings for which construction has started but have not yet been granted a Certificate of Occupancy. Planned buildings are not included.

Completed in 2018

New buildings with original construction completed in the year 2018 and granted a Certificate of Occupancy. Renovated buildings are not included.
