**SUMMARY & OUTLOOK**

The Ventura County industrial market witnessed vacancy rates increase from 2.1% to 2.6%, during the quarter. Average asking rents increased 7.1%, year over year, moving from \$0.70nnn to \$0.75nnn. Gross absorption finished the quarter with 720,000 square feet of activity, while net absorption finished with a gain of 117,000 square feet of occupied space. Under construction activity moved lower during the quarter with 167,000 square feet currently underway, as the market has delivered 853,000 square feet of new space for the year. Unemployment rates have declined from 4.3% to 3.7%, year over year, and are below California (3.9%) and slightly above the U.S. at 3.6%. Demand for industrial space will continue to be driven by domestic and global consumption levels. In 2017, the Los Angeles and Long Beach Port container traffic recorded its highest container total ever with 16.89 million TEU's, up 8% from 2016 and 7% higher than its second highest year during 2006. Through the third quarter of 2018, total TEU's totaled 12.8 million, up 2.7% compared to the same period last year, and up 11.5% compared to 2016. The investment and sale market for industrial real estate in Ventura County remains strong, as the total transaction volume recorded its highest total in more than a decade during 2017 and is on pace to equal or exceed that level in 2018, while median prices at up 8.8% for the year at \$148 PSF. The capital markets remain solid, but with the Fed continuing to raise interest rates at a measured pace, we do expect overall price growth and demand to cool in the coming year. The overall industrial market remains landlord controlled. We expect vacancy to remain in the 2% to 3% range, with some new construction coming online. We expect rents to increase 2% to 4% in the coming year, as pricing growth cools.

**VACANCY & NET ABSORPTION**

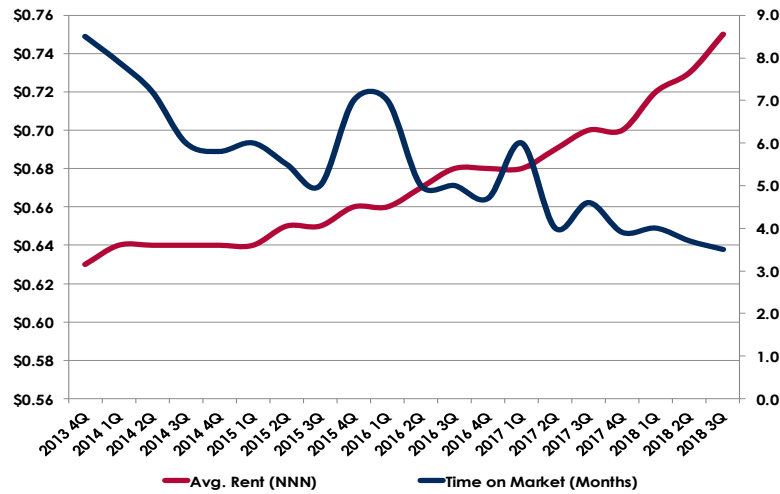

### VACANCY

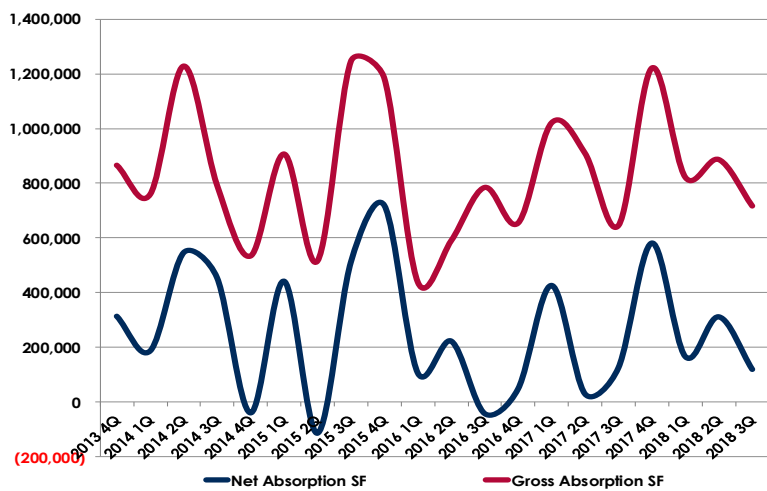

Overall vacancy rates (including sublease space) increased from 2.1% to 2.6%, during the quarter. Of the six (6) submarkets within the Ventura County market, the North Ventura County submarket ended the quarter with the lowest total vacancy of 0.2%, followed by Oxnard/Port Hueneme at 1.4%, Moorpark/Simi Valley at 2.5%, Ventura at 2.9%, the Conejo Valley at 3.7%, and Camarillo finishing the quarter at 4.6%. Since the third quarter of 2017, overall vacancy rates have decreased from 3.0% to 2.6%, and still remains near its lowest level in more than a decade.

### RENTAL RATES & TIME ON THE MARKET

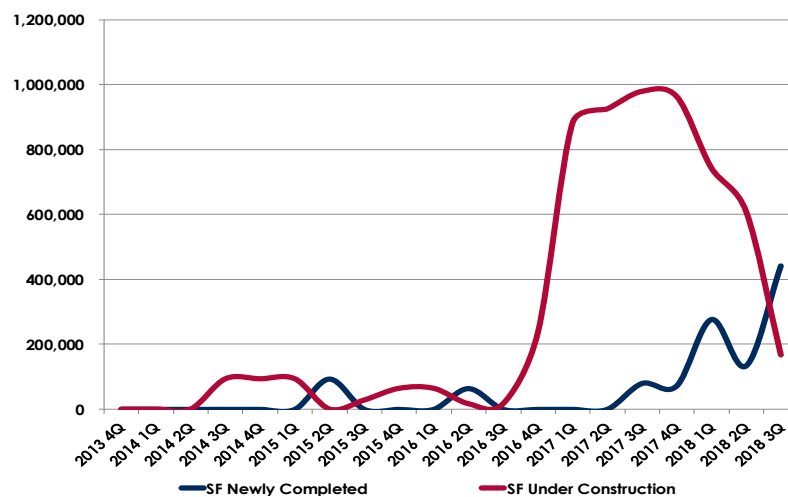

Standard industrial rental rates increased 7.1%, year over year, moving from \$0.70nnn to \$0.75nnn. Of the six (6) submarkets within the Ventura County market, the Conejo Valley submarket ended the quarter with the highest standard industrial rental rate of \$1.10nnn, followed by Moorpark/Simi Valley at \$0.89nnn, Ventura at \$0.73nnn, Oxnard/Port Hueneme and Camarillo at \$0.63nnn, and North Ventura County finishing the quarter at \$0.61nnn. Average industrial asking rents increased 2.7% from the previous quarter, moving from \$0.73nnn to \$0.75nnn, while the median time to lease reached a 5-year low at 3.5-months.

### ABSORPTION

During the quarter, gross absorption totaled 720,000 square feet, down 19% compared to the previous quarter, but higher by 11% compared to a year ago. Net absorption finished the quarter with a gain of 117,000 square feet and has gained 592,000 square feet for the year. In 2017, the market gained 1.2 million square feet after gaining 327,000 square feet in 2016, +1.6 million square feet in 2015, and +1.1 million square feet during 2014. We expect overall demand to remain near current levels, and the market will continue to be somewhat reliant on the delivery of new space for continued growth in the coming quarters, as available space remains scarce in most submarkets.

### CONSTRUCTION ACTIVITY

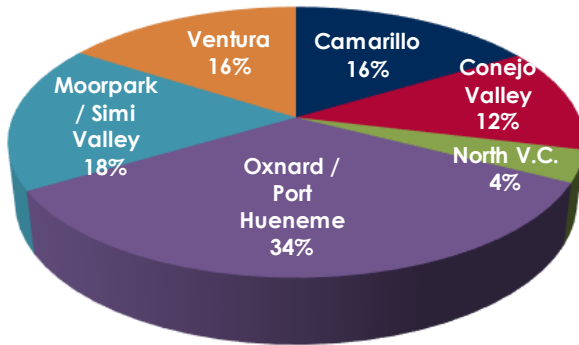

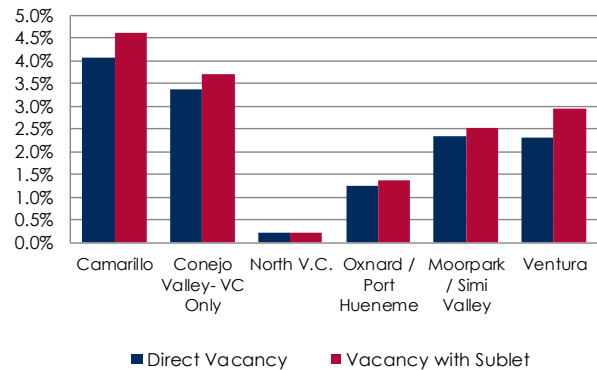

During the quarter, under construction activity decreased with 167,000 square feet currently underway, as the market has delivered 853,000 square feet of new space for the year. In 2017, the market added 152,000 square feet, after delivering 64,000 square feet in 2016 and 93,000 square feet during 2015. The market did not deliver any new space in 2013 or 2014. During the past five years, the market has averaged approximately 232,000 square feet of new deliveries, annually. New construction levels are expected to decline in the coming quarters, as the limited amount of available land for industrial development continues to restrict development opportunities throughout the county.

*The information contained in this report has been obtained from sources deemed reliable and has incorporated fourth-party data which has not been independently verified by DAUM. While we do not doubt its accuracy, DAUM makes no guarantee or warranty as to its completeness or accuracy. Due to the dynamic (constantly changing) database which DAUM uses to compile and analyze markets contained in this report, previously published statistics may vary from the data published in this report. Statistics and data have been revised to reflect changes in the following categories: existing buildings being verified and added to the database, new or revised occupancy information gathered, new construction being added to the inventory, building demolitions and renovations, as well as other factors that would necessitate revisions to the data and the properties surveyed. This methodology allows us to present the most current and up-to-date information, trend analysis and comparative statistics for this report.*

**METHODOLOGY & TERMINOLOGY**

**Methodology**

Industrial and flex (R & D) buildings that are 5,000 square feet and greater.

**Direct Vacant SF**

Space that is vacant and ready for occupancy by a user. The space is being offered for lease or sale directly from the landlord.

**Total Vacant W/ Sublet SF**

Space that is vacant and ready for occupancy by a user. The space is being offered for lease or sale by the landlord or for sublease by the current tenant.

**Direct Vacancy Rate**

Total vacant direct space (vacant space for lease or sale from the landlord or owner) divided by the total rentable square footage for existing buildings only.

**Vacancy W/ Sublet Rate**

Total vacant direct space and sublease space divided by the total rentable square footage for existing buildings only.

**Gross Absorption**

The total change in occupied space over a given period of time, counting space that is occupied but not space that is vacated by tenants. Gross absorption differs from leasing activity, which is the sum of all space leased over a certain period of time.

**Net Absorption**

The net change in occupied space over a given period of time, calculated by summing all the positive changes in occupancy (move ins) and subtracting all the negative changes in occupancy (move outs).

**Under Construction**

Planned buildings for which construction has started but have not yet been granted a Certificate of Occupancy. Planned buildings are not included.

**Completed in 2018**

New buildings with original construction completed in the year 2018 and granted a Certificate of Occupancy. Renovated buildings are not included.
